TUESDAY, MARCH 30, 1915.

THE WORST ENEMY.

Lloyd-George, the British Chancellor of the Exchequer, declared yesterday that "We are fighting two wars, Austria and drink, and so far as I can see the greater part of them deadly foes is drink." He had before him a document from the Shipbuilding Employers' Federation, which was present to ask him to take some steps to curtail the drink habit among their workmen. With plenty of work and good wages, many of the men were unable to withstand the temptation of strong drink. They argued that work was not the only reason why the employees were unable to carry on their business; thus making it difficult for the Government to get a sufficient quantity of the munitions of war in time to be of use. "So," he said, "the situation is a ready complete preparation for war." Mr. Lloyd-George stated that, if it found public opinion behind it to that extent, the Government would not hesitate to entirely suppress the drink traffic during the war. With the entry of Russia and France before it, we are not imagine that the British Government would hesitate to go the whole way. The British people cannot afford to risk defeat in their great undertaking through indulgence in strong drink. The Chancellor declared that "I have a growing conviction based on accumulated evidence that nothing but a rigid and abrupt method would be of the slightest avail for dealing with the evil. I believe it is the general feeling that if we are to subdue German militarism we must first of all settle with the drink." After this statement we need not be surprised to hear that drastic measures have been taken by the Government to save their men from the effects of drink. A private letter received from the old country the other day the statement is made that they never thought that drink would do such a curse to the soldier as it was proving to be during this war. This is the first time we have heard of the soldiers having a curse to drink.

Something has happened to the Ontario Government, since the amendments to the Liquor Act have been brought down. It was understood that one of the amendments was directed at the soldiers, preventing them from being served with liquor or tobacco while in uniform. The bill, however, did not contain any reference to the soldiers, that clause referring to them having been taken out. Mr. Hanna said, however, that there were provisions in the bill that would suit the purpose. The fact is, the Government has changed, and no doubt the soldiers can get all that they want "whether in uniform or not." The Women's Christian Temperance Union is circulating a petition for signatures to present to Premier Bondur, asking him to inform the British Government that the wives and mothers of Canadian soldiers to their husbands and sons will be held entreated to drink tempts while in the trenches, and they protest against such temptation. They do not object to exposing them to the bullets of the enemy, but they do object to having them exposed to the bottle. The women demand that the Government make laws so that no man who has boys will have liquor forced upon them in the trenches. They are willing to make the great sacrifice, but not to the drink itself.

THE PIRATES AT WORK.

German submarine torpedoes, and sink British liners, rendering, causing the death by drowning of one hundred and fifty persons, some of them women. Not sufficient warning was given to ascertain the crew and to make arrangements for their safety. No order was made by the Germans to save any of the people. It is recorded that they stood aside and laughed at their saw the men and women struggling in the cold, salt water. It is now known that the German submarine had given orders that in future no warning would be given British merchant vessels before they were torpedoed, as they had been armed to fight the German submarine. The Germans forgot the old saying used to be, "If you threaten me, I will threaten you." When they merely detained a prize, they would "not be armed." That brutal murder of females, sailors on the high seas in strong contrast to the British method of fighting submarine. In the naval annals, it is hard to conceive that such a thing could ever happen again.

As already stated by us, an International Conference of Women has been called by the women of Holland to meet at The Hague next month. The purpose of the meeting is to propose a resolution to the governments of Europe to prohibit the importation of arms and munitions of war.

The Hungarians are clapping the grafters in jail, and the newspapers demand that they be hanged. Over here in Canada they are being widely condemned. The Toronto Star, for example, has a large column of editorials denouncing the Hungarian newspaper which are exposing their frauds done during the war. They would prefer to have the German politicians who try to shield the grafters.

This villainous policy of making war upon non-combatants can have no influence on the course of the war other than to be a bad thing for Holland.

EDITORIAL NOTES.

All signs point to an early election. Get ready.

The unpredictable Turk may now be speechless.

The Golden Horn has no connection with Warner Horne.

The Prince Elstet is now between the devil and the deep sea.

The mine-sweeper is to a cause of chance, with his life at stake.

Take the "A" out of Hungary and you have the condition of the people over there.

President Wilson objects to people rocking the boat. He is afraid they may go on the rocks.

Mr. Burnham, Peckover's Tory member, is opposed to spending more on a Canadian navy. Wants to leave things as they are.

Brook Hughes, Gen. Hughes' own brother, has called a meeting before the Royal Commission that the bonds given his men looked like the ones used by military bands.

The fruit sellers and general men of the tradesmen's association, the Railway Board over the proposed increase of freight rates, Niagara fruit under a higher tariff.

Charles R. Stiner, who had the gall to order an order for 17,000 pairs of boots for the Gauthier Shoe company, for the Government. His commission was 50 cents a pair and he thus pocketed \$8,500 good money. This admission, it is reported, was made under threat of being arrested.

In Parliament yesterday Gen. Higham said that it was proposed to keep 10,000 Canadians in the firing line during the whole year, if necessary.

If needed it would be increased to 15,000 men and more, "but will be required." An amendment will be voted in Mr. F. F. Fardey, the Liberal whip.

"To do our best to keep this doll from you as long as you can make bullets and guns to kill my sons."

This little note, pinned to a returned Christmas gift sent by an American woman to a Canadian girl in Germany, may never be taken against a national rebuke, says the Buffalo News. But had they made bullet to kill somebody else's sons the doll would have been accepted, no doubt.

Senator Hoke Smith, of Georgia, is credited with saying that he is in favor of a general mobilization.

He believes that a number of manufacturers holding contracts for making half a million pairs of boots finished them with paper soles.

The soldiers were sent in dry weather, in wet weather in ten days.

He, however, has not mentioned any top pairs. A dozen other wealthy and influential Southerners were arrested, this time in Memphis.

Two days later a still more extensive fraud was discovered; this time the manufacturers of boots, who had sold them at a loss, were being served with legal action.

It is believed that a stockade, according to the London Conference is not practicable.

He knows also that such a conference is not binding on the nations. Why should the Senator be so anxious to this note to Germany?

THE GRAFTER GANG.

Grafters are confined to no country. Those that thrive in Canada, they also prosper abroad. The London Morning Post publication from its Budget correspondence some particulars of the doings of the fraternity over in Hungary. At Szeged a prominent wholesale dealer was fined for bribing officers, who made it possible for him to supply the army with inferior food, paying higher prices than the others were having to pay and the same.

It is believed that a number of manufacturers holding contracts for making uniforms and equipment for the British Army, France, and Russia, were given a free hand to sell their goods at a loss.

LIQUOR IS NOW WORSE ENEMY THAN GERMANS

Lloyd-George Warns Britain That Sale May Be Totally Prohibited.

HINDERS ARMY

Reports to Battleships Delayed While Ship Workers Celebrate.

London, March 29.—"We are fighting Germany, Austria and drink, and so far as I see, the greatest of these three deadly foes is drink," said David Lloyd-George, controller of the Exchequer, referring to a discussion of the war-taxed Employed Federation, the members of which were mainly thermal therapeutics. "The movement is urging that, instead of 10 per cent., the present requirements at 20 per cent. should be increased to 30 per cent. as a tax on the sale of intoxicating liquors." This would not only apply to public houses, but also to private clubs, so as to prevent the latter from being the centers of the movement.

It was pointed that despite the fact that the war was being carried on night and day seven days in the week, the total working time on the average in normal times was less than 40 hours actually less than before the war and the average productiveness had decreased. There were now a total of 100,000 men of all ages in the service of the state of intoxicating liquors. This should not only apply to public houses, but also to private clubs, so as to prevent the latter from being the centers of the movement.

It was agreed that despite the fact that the war was being carried on night and day seven days in the week, the total working time on the average in normal times was less than 40 hours actually less than before the war and the average productiveness had decreased. There were now a total of 100,000 men of all ages in the service of the state of intoxicating liquors. This should not only apply to public houses, but also to private clubs, so as to prevent the latter from being the centers of the movement.

Notwithstanding the curtailment of time which the army required to keep open, the receipts of the public houses in the neighborhood of the shipyards had greatly increased during the last few months.

As an instance of one of many similar cases, that of a battleship coming in for repairs, the work was delayed, a whole day through the absence of riveters who were drinking and carousing.

In one yard the riveters had been working on the average only forty hours a week, and in another yard only 28 hours.

In conclusion, the deputation, which included representatives of the shipyards and of the rest of the country, drew attention to the example set by France and Russia, and urged upon the Chamber of Deputies of drastic and immediate action.

The Chancellor of the Exchequer, Mr. Lloyd-George, said he understood the reason why the Government had not hitherto taken more drastic action on the liquor question. It was because it interested him that the movement was not doing adverse to public sympathy; otherwise more harm would be done than good.

He had a growing conviction based on accumulating evidence," continued the Chancellor, "that nothing but root and branch reorganization will be of the slightest avail in dealing with the evil. I believe in the general principle that if we want to defeat German militarism we must first of all settle with the drink."

Mr. Lloyd-George intimated that Lord Kitchener, the Secretary for War, and Field Marshal French, in command of the British forces in France and Flanders, were of the same opinion, and he promised to lay the statements of the deputation before the government.

He added: "I had the privilege of an audience with His Majesty this morning, and am assured that he is very much aware of the very deeply concerned that this question—very deeply concerned, and the concern which is felt by him, I am sure, is that of his subjects in this country."

SNIPERS ARE GREAT MENACE

Pte. Jamison Tells of Some Fun in the Trenches.

It is the Going in and Out That is Dangerous.

Mrs. W. G. Macmillan, of the law office of W. L. Ross, has been writing at the front, fighting in the trenches. A recent letter she receives a letter from one of the boys, each one full of interest and optimism. One from the Rossiter family, Pte. Crawford this morning, telling of how Jameson states that the trenches are still very wet, but not nearly as bad as the ones down the wire road. He says: "We have a great time cooking our own food. It is really funny. The man who cooks does as good as a dead man. He has done a considerable travelling over France, and has been in contact with the enemy." One city we were in was shelled. Our mammoth machine gun did not do much damage. At present I am away from the trenches, but all day we hear the artillery, and it is great to watch them go after a house or building where there were probably old and dead. At present

we are away from the trenches, but all day we hear the artillery, and it is great to watch them go after a house or building where there were probably old and dead. At present I am away from the trenches, but all day we hear the artillery, and it is great to watch them go after a house or building where there were probably old and dead. At present

The by-election held in the North-West Territories on Saturday, the Brockville Town Council called for the recent unsatisfactory of Counsellor A. T. Williams, resulted in a victory for Mr. T. T. T. T. Williams by a majority of one vote.

Edward Grass, aged seventy-two, a lifelong resident of St. Catharines, and the son of a local London doctor, dropped dead at his home Monday, after having returned from work complaining of not feeling well. He was buried yesterday.

Kenneth N. Carr, Toronto, found guilty of beating his young servant, Billie Williams, in the basement of his home, was sentenced to six months in jail, by Judge Coalter. Of this amount the court will receive a compensation of \$100 for the suffering inflicted.

Fire broke out Monday afternoon in the new million-dollar elevator on the water front belonging to the Canadian Pacific. It contained hay, which it is said, was ignited by a spark from a passing car.

Edgar C. Hart, Toronto, was prepared for shipment to Europe, and was the property of the Canadian Government.

SUN YAT SEN

Exiled Chinese President Accuses
Yuan of Treachery.

(By Times Special Cable)

Hongkong, March 29.—A letter written by Dr. Sun, under date of March 16, to friends here, Dr. Sun Yat Sen, former President of the Chinese Republic, and now political exile in Japan, denies that he has entered into any secret agreement with Dr. Hui Kai, present head of the Chinese Government, and, in a warning to his compatriots, also states that he has arrived into a temporary compact with Japan to concede that Government's demands, respecting the return of Manchuria, of Korea, and parts of Manchuria, to suppress "liberty-loving Chinese."

This letter asserts that "Asia has arrived." If Japan, he says, is permitted to carry out her plans, either the great powers will demand portions of China as their compensation.

"This means," the letter declares, "total war of dismemberment and destruction."

He has positive proof of these things, he says, and lies in the face of current history."

Japan, according to Dr. Sun, "would expand its power."

The only way to save China, the letter concludes, "is in a complete reorganization of the Chinese Government, immediate action being taken by the quickest step possible. That step is revolution."

"This means," the letter declares, "total war of dismemberment and destruction."

He has positive proof of these things, he says, and lies in the face of current history."

Japan, according to Dr. Sun, "would expand its power."

The only way to save China, the letter concludes, "is in a complete reorganization of the Chinese Government, immediate action being taken by the quickest step possible. That step is revolution."

"This means," the letter declares, "total war of dismemberment and destruction."

He has positive proof of these things, he says, and lies in the face of current history."

Japan, according to Dr. Sun, "would expand its power."
